Packaging

100% of HP paper-based packaging is from recycled or certified sustainable sources. [6]

Thoughtfully selected materials

Post-consumer recycled plastic

The system contains at least 65% post-consumer recycled plastic.[1]

Ocean-bound plastic

The HP Z2 Mini G1i Workstation incorporates at least 25% ocean-bound plastics in its fan components.[2]

Post-industrial recycled steel

This product is constructed with at least 20% post-industrial recycled steel.[3]

Recycled rare earth elements

This product features 100% recycled rare earth elements in its speaker magnet.

Additional sustainability highlights

The HP Z2 Mini G1i features a QR code-enabled experience that provides access to a product portal with product feature highlights, sustainability information, getting started guides, and direct setup and support options.

1. Recycled plastic is expressed as a percentage of the total weight plastic. Post-consumer recycled is based on the definition set in the EPEAT standard for computers, IEEE 1680.1-2018 standard.
2. Percentage of ocean-bound plastic contained in each component varies by product. Ocean Bound plastic is expressed as a percentage of the total weight plastic. Ocean Bound plastic is based on the definition set by the UL2809 standard.
3. Recycled metal is expressed as a percentage of the total weight of the metal according to ISO 14021 definitions for metal parts over 25 grams.
4. Based on US EPEAT® registration according to IEEE 1680.1-2018 EPEAT®. Status can vary by country. Visit www.epeat.net for more information.
5. ENERGY STAR® and the ENERGY STAR® logo are registered U.S. marks.
6. HP paper and fiber based packaging for PCs, displays, home and office print, and supplies is reported by suppliers as recycled or certified, with a minimum of 97% by volume verified by HP. Packaging is the box that comes with the product and all paper-based materials inside the box. Packaging for personal systems accessories and spare parts is not included.
