## Overview

The HPE Aruba Networking 570 Series Outdoor Access Points provide high-performance Wi-Fi 6 wireless connectivity for harsh outdoor weather conditions such as parking lots, stadiums, and public venues. With Wi-Fi 6 capabilities, Bluetooth 5 and 802.15.4/Zigbee radios, and a maximum aggregate data rate of 2.69 Gbps, the 570 series delivers the speed and reliability needed to bring Wi-Fi 6 outdoors.

These Wi-Fi 6 outdoor access points are ready to survive high wind, extreme temperatures, and moisture and can be quickly deployed using zero touch provisioning. HPE Aruba Networking Central provides a single pane of glass for overseeing wired and wireless LANs, WANs, and VPNs. AIpowered analytics, endtoend orchestration and automation, and advanced security features are built natively into the solution.  The 570 series include a limited lifetime warranty.

# Features

### Reliable Outdoor Wi-Fi 6

HPE Aruba Networking 570 Series Outdoor Access Points support the Wi-Fi 6 standard, including features such as orthogonal frequency-division multiple access (OFDMA), bi-directional multi-user MIMO (MU-MIMO), and target wait time (TWT).

Purpose-built to withstand extreme temperatures, persistent moisture and precipitation and fully sealed to keep out airborne contaminants.

Weatherproof and temperature hardened, this series can handle temperatures ranging from -40˚C to +65˚C, including full sun deployments.

Enhanced wireless experience with HPE Aruba Networking ClientMatch technology removes sticky client issues by steering a client to the access point where it receives the best radio signal.

### IoT Ready

HPE Aruba Networking 570 Series Outdoor access points can serve as IoT platforms that bolster network security and provide coverage for a range of IoT devices without the need for network overlays.

It supports Bluetooth 5 and Zigbee wireless protocols through an integrated IoT radio, and third-party expansion with an integrated USB port.

Target wake time (TWT) improves the battery life of IoT devices.

HPE Aruba Networking Central Client Insights uses deep packet inspection to provide additional context and behavioral information that helps verify devices are receiving proper policy enforcement and continuously monitor for rogue devices.

### Simple Access With Enhanced Security

The HPE Aruba Networking 570 Series Outdoor Access Points offer enhanced security with dynamic segmentation to remove the time consuming and error-prone task of managing complex and static VLANs, ACLs, and subnets by dynamically assigning policies and keeping traffic protected and separated.

It offers stronger encryption and authentication with WPA3, protected credentials/keys storage for guest access with Enhanced Open, and user and IoT access policy enforcement firewalls (PEFs).

It simplifies policy enforcement by using the PEF to encapsulate all traffic from the access point to the gateway (or mobility controller) for end-to-end encryption and inspection.

For enhanced device assurance, HPE Aruba Networking access points include an installed trusted platform module (TPM).
