HPE aruba networking

Data sheet

HPE Aruba Networking 2930M Switch Series

HPE

Key features

— Enterprise Layer 3 access switches with support for ACLs, robust QoS and common protocols like static, RIP and Access OSPF routing

— Scalability with 10-member backplane VSF stacking up to 480 downlink ports, and models that support 1GbE, 10GbE, and HPE Smart Rate 1/2.5/5/10GbE multi-gigabit Ethernet

— Modular uplink options include 4-port 10GbE SFP+ with MACsec, 4-port 1/2.5/5/10GbE HPE Smart Rate (IEEE 802.3bz), and 1-port 40GbE QSFP+ modules for seamless expansion as the network grows

— Convenient powering with field replaceable power supplies and industry standard Power over Ethernet (PoE), supporting up to 30W of Class 4 and 60W of Class 6 PoE per port

— Simple deployment with zero touch provisioning (ZTP)

— Secure and simple access for users and IoT with HPE Aruba Networking dynamic segmentation

— Management flexibility with support for HPE Aruba Networking Central, easy to use Web GUI, and CLI

— Ready for software defined networking with programmable ASIC, REST APIs, and OpenFlow support, enabling greater flexibility and control

Product overview

The HPE Aruba Networking 2930M Switch Series is designed for customers creating smart digital workplaces that are optimized for mobile users with an integrated wired and wireless approach. These Layer 3 network switches include built-in uplinks and PoE power. They are simple to deploy and manage with advanced security and network management tools like ClearPass Policy Manager and cloud-based HPE Aruba Networking Central.

A powerful HPE Aruba Networking ProVision ASIC delivers performance, robust feature support, and value with flexible programmability for the latest applications. High performance modular stacking for up to 10 switches provides pay-as-you-grow scalability and simplicity. The flexible 2930M supports wire speed 10GbE and 40GbE uplinks, redundant dual modular power supplies for up to 1440W of PoE, and new models with industry-standard IEEE 802.3bt Class 6 that provide up to 60W of PoE per port. HPE Smart Rate multi-gigabit Ethernet models pave the way for high-speed APs and IoT devices by delivering fast connectivity and PoE power using existing campus cabling.

The feature rich 2930M supports a robust QoS, RIP, Access OSPF routing, PIM, VRRP, IPv6 and dynamic segmentation for unified and secure access.

The HPE Aruba Networking 2930M Switch Series provides a simple and powerful access layer solution that can be quickly set up at branch offices with little or no IT support using zero touch deployment. The switches include a limited lifetime warranty.

Enhanced capabilities

Software-defined networks

— Supports multiple programmatic interfaces, including REST APIs and OpenFlow 1.0 and 1.3, to enable automation of network operations, monitoring, and troubleshooting

Unified wired and wireless support

— Supports unified wired and wireless policies using HPE Aruba Networking NAC

— Switch auto-configuration automatically configures switch settings such as VLAN, CoS, PoE max power, and PoE priority when an HPE Aruba Networking access point is detected

— User role defines a set of switch-based policies in areas such as security, authentication, and QoS. A user role can be assigned to a group of users or devices, using switch-based local user role or download from HPE Aruba Networking NAC

— For improved network simplicity and security, HPE Aruba Networking dynamic segmentation automatically enforces user, device, and application-aware policies on HPE Aruba Networking wired and wireless networks. Automated device profiling, role-based access control, and Layer 7 firewall features deliver enhanced visibility and performance for a better overall experience for both IT and end-users alike

— Dynamic segmentation provides a secure tunnel that transports network traffic on a per-port or per-user role basis to an HPE Aruba Networking Controller. In a per-user role Tunnel Node, users are authenticated by the HPE Aruba Networking NAC which directs traffic to be tunneled to a controller or switch locally

Quality of Service (QoS)

— Traffic prioritization (IEEE 802.1p) for real-time classification into eight priority levels mapped to eight queues

— Layer 4 prioritization based on TCP/UDP port numbers

— Class of Service (CoS) sets the IEEE 802.1p priority tag based on IP address, IP Type of Service (ToS), Layer 3 protocol, TCP/UDP port number, source port, and DiffServ

— Rate limiting sets per-port ingress enforced maximums and per-port, per-queue minimums

— Large buffers provide graceful congestion management

— Unknown Unicast Rate Limiting throttles unicast packets with unknown destination addresses and limits flooding on the VLAN

Connectivity

— HPE Smart Rate multi-gigabit (IEEE 802.3bz) Ethernet supports high speed wireless access points. Flexible configurations include:

- Switch with 24 Smart Rate ports supporting high power IEEE 802.3bt Class 6 (60W)
- Switch with 40 gigabit ports and 8 Smart Rate ports supporting high power IEEE 802.3bt Class 6 (60W)
- All 2930M switches support optional 4 port Smart Rate module

— Flexible 10 Gbps Ethernet connectivity — Modular 4 port 10 Gigabit (SFP+) available

— Models with IEEE 802.3bt Class 6 PoE provides up to 60W per port for IEEE 802.3bt compatible devices

— 40 Gbps Uplink port connectivity — Modular 40 Gbps QSFP+ port available

— Auto-MDIX provides automatic adjustments for straight-through or crossover cables on all 10/100 and 10/100/1000 ports

— IEEE 802.3at Power over Ethernet (PoE+) provides up to 30W per port that allows support of the latest PoE+-capable devices such as IP phones, wireless access points, and security cameras, as well as any IEEE 802.3af-compliant end device; eliminates the cost of additional electrical cabling and circuits that would otherwise be necessary in IP phone and WLAN deployments

— Support for pre-standard PoE detects and provides power to pre-standard PoE devices

— IPv6

- IPv6 host enables switches to be managed in an IPv6 network
- Dual stack (IPv4 and IPv6) transitions from IPv4 to IPv6, supporting connectivity for both protocols
- MLD snooping forwards IPv6 multicast traffic to the appropriate interface
- IPv6 ACL/QoS supports ACL and QoS for IPv6 network traffic
- IPv6 Routing supports Static, RIPng and OSPFv3 protocols
- Security provides RA guard, DHCPv6 protection, dynamic IPv6 lockdown, and ND snooping

Performance and efficiency

— Energy-efficient design

- 80 PLUS Gold and Platinum Certified power supplies increase power efficiency and savings
- Energy-efficient Ethernet (EEE) support reduces power consumption in accordance with IEEE 802.3az

— Designed with the latest HPE Aruba Networking ProVision ASIC, providing very low latency, increased packet buffering, and adaptive power consumption

— Selectable queue configurations allow for increased performance by selecting the number of queues and associated memory buffering that best meet the requirements of the network applications

— VSF Stacking — scale and simplicity
  - The HPE Aruba Networking Virtual Switching Framework (VSF) on the 2930M series allows you to quickly grow your network using resilient, stacking with the following benefits:
  - High performance stacking — up to 100 Gbps of stacking throughput per switch. Each 2-port stacking module can support up to 25 Gbps in each direction per port.
  - Support for ring and chain topology with a stack of up to 10 switch members
  - Simplified configuration and management as the switches act as a single chassis when stacked

Convergence

— IP multicast snooping and data-driven IGMP automatically prevent flooding of IP multicast traffic

— LLDP-MED (Media Endpoint Discovery) defines a standard extension of LLDP that stores values for parameters such as QoS and VLAN to configure automatically network devices such as IP phones

— IEEE 802.1AB Link Layer Discovery Protocol (LLDP) facilitates easy mapping using network management applications with LLDP automated device discovery protocol

— PoE and PoE+ allocations support multiple methods (automatic, IEEE 802.3 at dynamic, LLDP-MED fine grain, IEEE 802.3af device class, or user-specified) to allocate and manage PoE/PoE+ power for more efficient energy savings

— PoE Class 6 allocations support increased dynamic power up to 60W with new IEEE 802.3bt LLDP type, length, and value (TLV) information extended to 29 octets

— Local MAC Authentication assigns attributes such as VLAN and QoS using locally configured profile that can be a list of MAC prefixes

— IP multicast routing includes PIM sparse and dense modes to route IP multicast traffic

— Protocol Independent Multicast for IPv6 supports one-to- many and many-to-many media casting use cases such as IPTV over IPv6 networks

Resiliency and high availability

— Virtual Router Redundancy Protocol (VRRP) allows groups of two routers to back each other up dynamically to create highly available routed environments in IPv4 and IPv6 networks

— IEEE 802.1s Multiple Spanning Tree provides high link availability in multiple VLAN environments by allowing multiple Spanning Trees; provides legacy support for IEEE 802.1d and IEEE 802.1w

— IEEE 802.3ad Link Aggregation Control Protocol (LACP) and port trunking supports up to 60 static and dynamic trunks with each trunk having up to eight links (ports) per static trunk

— SmartLink provides easy-to-configure link redundancy of active and standby links

— Dual hot-swappable power supplies
  - Increased resiliency provides secondary power supply to enable complete switch power redundancy in case or power line or supply failure
  - Increased PoE power provides secondary power supply to increase the total available PoE power

Simplified configuration and management

— HPE Aruba Networking Central cloud-based management platform offers simple, secure, and cost-effective way to manage switches

— Zero touch provisioning (ZTP) simplifies day zero deployment and installation

— Built-in programmable and easy to use REST API interface provides configuration automation for campus networks

— Out-of-band Ethernet management port enables management on a separate physical management network, and keeps management traffic segmented from network data traffic

— SNMPv1, v2, and v3 provide complete support of SNMP; provide full support of industry-standard management information base (MIB) plus private extensions; SNMPv3 supports increased security using encryption

Manageability

— Dual flash images provide independent primary and secondary operating system files for backup while upgrading

— Friendly port names allow assignment of descriptive names to ports

— Find-Fix-Inform feature finds and fixes common network problems automatically, then informs administrator

— Supports multiple configuration files to be stored to a flash image

— RMON, XRMON, and sFlow® provide advanced monitoring and reporting capabilities for statistics, history, alarms, and events

— Troubleshooting ingress and egress port monitoring enable more efficient network problem solving

— Unidirectional link detection (UDLD) monitors the link between two switches and blocks the ports on both ends of the link if the link goes down at any point between the two devices

— Power down mode delivers power savings by allowing the switch to power down most of the switch, except a clock which will boot up the switch when scheduled

Layer 2 switching

— IEEE802.1ad QinQ — Increases the scalability of an Ethernet network by providing a hierarchical structure; connects multiple LANs on a high-speed campus or metro network

— VLAN Support and Tagging supports IEEE 802.1Q (4094 VLAN IDs) and 2K VLANs simultaneously

— Jumbo packet support improves the performance of large data transfers; supports frame size of up to 9220 bytes

— IEEE 802.1v protocol VLANs isolate select non-IPv4 protocols automatically into their own VLANs

— Rapid per VLAN Spanning Tree (RPVST+) allows each VLAN to build a separate Spanning Tree to improve link bandwidth usage; is compatible with PVST+

— GVRP and MVRP allows automatic learning and dynamic assignment of VLANs

— VLAN encapsulation (tunneling) protocol for overlay network that enables a more scalable virtual network deployment

— IEEE 1588v2 transparent clock Mode[1] — step and end-to-end delay mode support critical timing applications

Layer 3 services

— DHCP server centralizes and reduces the cost of IPv4 address management

Layer 3 routing

— Static IP routing provides manually configured routing; includes ECMP capability

— Routing Information Protocol (RIP) provides RIPv1, RIPv2, and RIPng routing

— Access OSPF provides OSPFv2 and OSPFv3 protocols for routing between access and the next layer on the LAN. One OSPF area and up to eight interfaces are supported

— Policy-based routing uses a classifier to select traffic that can be forwarded based on policy set by the network administrator (limited to 16 next-hop routes)

Security

— Multiple user authentication methods

- Uses an IEEE 802.1X supplicant on the client in conjunction with a RADIUS server to authenticate in accordance with industry standards
- Supports web-based authentication
- Supports MAC-based client authentication

— TPM-based security

- Includes a Trusted Platform Module (TPM) for secure hardware-based generation and storage of cryptographic keys that can be used for a variety of authentication purposes

— Authentication flexibility

- Multiple IEEE 802.1X users per port provides authentication of multiple devices on a single port; prevents a user from "piggybacking" on another user's IEEE 802.1X authentication
- Concurrent IEEE 802.1X, web, and MAC authentication schemes per port switch port will accept up to 32 sessions of IEEE 802.1X, web, and MAC authentications

— Open Authentication Role simplifies first-time deployment of AAA in brownfield deployments by allowing full network access for failed clients and provides instant connectivity as soon as a client is plugged-in

— Critical Authentication Role ensures that important infrastructure devices such as IP phones are allowed network access even in the absence of a RADIUS server

— MAC Pinning allows non-chatty legacy devices to stay authenticated by pinning client MAC addresses to the port until the clients log off or get disconnected

— Access control lists (ACLs) provide IP Layer 3 filtering based on source/destination IP address/subnet and source/destination TCP/UDP port number

— Source-port filtering allows only specified ports to communicate with each other

— Control Plane Policing: Set rate limit on control protocols to protect CPU overload

— RADIUS/TACACS+ eases switch management security administration by using a password authentication server

— Secure shell encrypts all transmitted data for secure remote CLI access over IP networks

— Secure Sockets Layer (SSL) encrypts all HTTP traffic, allowing secure access to the browser-based management GUI in the switch

— Port security allows access only to specified MAC addresses, which can be learned or specified by the administrator

— Radius over TLS (RadSec) allows users to use a more secure and reliable mode of communications between switch and RADIUS servers over unsecure networks

[1] IEEE 1588v2 (PTP) is not supported on the following 2930M models: JL323A, JL324A, R0M67A, R0M68A or 2930M modules: JL325A, JL078A, JL081A, JL083A

— MAC address lockout prevents particular configured MAC addresses from connecting to the network
— Secure FTP allows secure file transfer to and from the switch; protects against unwanted file downloads or unauthorized copying of a switch configuration file
— Switch management logon security helps secure switch CLI logon by optionally requiring either RADIUS or TACACS+ authentication
— Custom banner displays security policy when users log in to the switch
— STP BPDU port protection blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks
— DHCP protection blocks DHCP packets from unauthorized DHCP servers, preventing denial-of-service attacks
— Dynamic ARP protection blocks ARP broadcasts from unauthorized hosts, preventing eavesdropping or theft of network data
— STP root guard protects the root bridge from malicious attacks or configuration mistakes
— Identity-driven ACL enables implementation of a highly granular and flexible access security policy and VLAN assignment specific to each authenticated network user
— Per-port broadcast throttling configures broadcast control selectively on heavy traffic port uplinks
— Private VLAN provides network security by restricting peer-to-peer communication to prevent a variety of malicious attacks; typically a switch port can only communicate with other ports in the same community and/or an uplink port, regardless of VLAN ID or destination MAC address
— IEEE 802.1AE MACsec provides security on a link between two switch ports (1 Gbps or 10 Gbps or HPE Smart Rate) using standard encryption and authentication
— Enrollment over Secure Transport (EST) enhances the switch PKI infrastructure with a simpler, scalable, and more secure method of certificate provisioning, re-enrollment, and renewal

Monitor and diagnostics

— Digital optical monitoring of SFP+ and 1000Base-T transceivers allows detailed monitoring of the transceiver settings and parameters

Customer first, customer last support

When your network is important to your business, then your business needs the backing of HPE Aruba Networking Support Services. Partner with HPE Aruba Networking product experts to increase your team's productivity, keep pace with technology advances, software releases, and obtain break-fix support.

HPE Aruba Networking Foundational Care support services include priority access to HPE Aruba Networking Technical Assistance Center (TAC) engineers 24x7x365, flexible hardware and On-site support options, and total coverage for HPE Aruba Networking products. HPE Aruba Networking Switches with an assigned HPE Aruba Networking Central Subscription are eligible for additional hardware support and replacement options for purchase.

HPE Aruba Networking Pro Care adds fast access to senior TAC engineers, who are assigned as a single point of contact for case management, reducing the time spent addressing and resolving issues.

For complete details on Foundational Care and Pro Care, please visit: arubanetworks.com/support-services/

Warranty, services, and support

— Limited lifetime warranty, see arubanetworks.com/support-services/product-warranties/ for warranty and support information included with your product purchase
— For software releases and documentation, refer to networkingsupport.hpe.com/downloads
— For support and services information, visit arubanetworks.com/support-services/

HPE Aruba Networking 2930M Switch Series accessories

Modules

— HPE Aruba Networking 2930M 2-port Stacking Module (JL325A)
— HPE Aruba Networking 3810M/2930M 1QSFP+ 40GbE Module (JL078A)
— HPE Aruba Networking 3810M/2930M 4SFP+ MACsec Module (JL083A)
— HPE Aruba Networking 3810M/2930M 4 1/2.5/5/10GbE HPE Smart Rate Module (JL081A)

TAA-Compliant Transceivers

— HPE Aruba Networking 1G SFP LC SX 500m MMF TAA XCVR (JL745A)
— HPE Aruba Networking 1G SFP LC LX 10km SMF TAA XCVR (JL746A)
— HPE Aruba Networking 1G SFP RJ45 T 100m Cat5e TAA XCVR (JL747A)
— HPE Aruba Networking 10G SFP+ LC SR 300m MMF TAA XCVR (JL748A)
— HPE Aruba Networking 10G SFP+ LC LR 10km SMF TAA XCVR (JL749A)

Transceivers

— HPE Aruba Networking 100M SFP LC FX 2km MMF XCVR (J9054D)
— HPE Aruba Networking 1G SFP RJ45 T 100m Cat5e XCVR (J8177D)
— HPE Aruba Networking 1G SFP LC SX 500m MMF XCVR (J4858D)
— HPE Aruba Networking 1G SFP LC LX 10km SMF XCVR (J4859D)
— HPE Aruba Networking 1G SFP LC LH 70km SMF XCVR (J4860D)
— HPE Aruba Networking 10G SFP+ LC SR 300m MMF XCVR (J9150D)
— HPE Aruba Networking 10G SFP+ LC LR 10km SMF XCVR (J9151E)
— HPE Aruba Networking 10G SFP+ LC LRM 220m MMF XCVR (J9152D)
— HPE Aruba Networking 10G SFP+ LC ER 40km SMF XCVR (J9153D)
— HPE Aruba Networking 10G SR SFP+ LC 400m OM4 C-XCVR (S2P30A)
— HPE Aruba Networking 10G LR SFP+ LC 10km SMF C-XCVR (S2P31A)
— HPE Aruba Networking 10G ER SFP+ LC 40km SMF C-XCVR (S2P32A)
— HPE Aruba Networking 10G SFP+ to SFP+ 1m DAC Cable (J9281D)
— HPE Aruba Networking 10G SFP+ to SFP+ 3m DAC Cable (J9283D)
— HPE Aruba Networking 10G SFP+ to SFP+ 7m DAC Cable (J9285D)
— HPE Aruba Networking 40G QSFP+ LC BiDi 150m MMF XCVR (JL308A)
— HPE X142 40G QSFP+ MPO SR4 Transceiver (JH231A)
— HPE X142 40G QSFP+ LC LR4 SM Transceiver (JH232A)
— HPE X142 40G QSFP+ MPO eSR4 300M XCVR (JH233A)
— HPE X242 40G QSFP+ to QSFP+ 1m DAC Cable (JH234A)
— HPE X242 40G QSFP+ to QSFP+ 3m DAC Cable (JH235A)
— HPE X242 40G QSFP+ to QSFP+ 5m DAC Cable (JH236A)

Stacking cables

— HPE Aruba Networking 2920/2930M 0.5m Stacking Cable (J9734A)
— HPE Aruba Networking 2920/2930M 1m Stacking Cable (J9735A)
— HPE Aruba Networking 2920/2930M 3m Stacking Cable (J9736A)

Power supplies

— HPE Aruba Networking X371 12VDC 250W 100-240VAC Power Supply (JL085A)
— HPE Aruba Networking X372 54VDC 680W 100-240VAC Power Supply (JL086A)
— HPE Aruba Networking X372 54VDC 1050W 110-240VAC Power Supply (JL087A)

Mounting kit

— HPE X410 1U Universal 4-post Rack Mounting Kit (J9583A)
— HPE Aruba Networking X414 1U Universal 4-post Rack Mounting Kit (J9583B)

Cables

— HPE Aruba Networking X2C2 RJ45 to DB9 Console Cable (JL448A)

Licenses

— HPE Aruba Networking Central Switch 6200/29xx Foundational 1-Year Subscription E-STU (Q9Y73AAE)
— HPE Aruba Networking Central Switch 6200/29xx Foundational 3-Year Subscription E-STU (Q9Y74AAE)
— HPE Aruba Networking Central Switch 6200/29xx Foundational 5-Year Subscription E-STU (Q9Y75AAE)
— HPE Aruba Networking Central Switch 6200/29xx Foundational 7-Year Subscription E-STU (Q9Y76AAE)
— HPE Aruba Networking Central Switch 6200/2 Foundational 10-Year Subscription E-STU (Q9Y77AAE)
— HPE Aruba Networking Central On-Premises 62xx or 29xx Switch Foundational 1-Year Subscription E-STU (R6U78AAE)
— HPE Aruba Networking Central On-Premises 62xx or 29xx Switch Foundational 3-Year Subscription E-STU (R6U79AAE)
— HPE Aruba Networking Central On-Premises 62xx or 29xx Switch Foundational 5-Year Subscription E-STU (R6U80AAE)
— HPE Aruba Networking Central On-Premises 62xx or 29xx Switch Foundational 7-Year Subscription E-STU (R6U81AAE)
— HPE Aruba Networking Central On-Premises 62xx or 29xx Switch Foundational 10-Year Subscription E-STU (R6U82AAE)

For details and complete listing of HPE Aruba Networking Central licensing options, please refer to the HPE Aruba Networking Central Data Sheet

Support

— JL319A: 4 Hour On-site 3-Year (H1TQ7E)
— JL320A: 4 Hour On-site 3-Year (H1TZ8E)
— JL321A: 4 Hour On-site 3-Year (H2BS5E)
— JL322A: 4 Hour On-site 3-Year (H2CB6E)
— JL323A: 4 Hour On-site 3-Year (HT6V1E)
— JL324A: 4 Hour On-site 3-Year (HT6V1E)
— R0M67A: 4 Hour On-site 3-Year (HT6V1E)
— R0M68A: 4 Hour On-site 3-Year (HT6V1E)
